DETAILED ACTION

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because it contains the word "said".

Correction is required. See MPEP § 608.01(b).

Drawings

Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 2 it is not clear as to whether the "front side" is of the base panel or of the briefs. In line 5 it is also not clear as to what the "top side" is of. In lines 8 and 1-13 there is no antecedent basis for the term "the midpoint of the top side" and "the midpoint of the bottom side". It is not clear as to whether the "midpoints" are of a horizontal or vertical midpoint. In line 15 the term "a middle part thereof" is unclear in that it is not clear as to what the midpoint is of or if it is a horizontal midpoint or a vertical midpoint or as to which direction the seam is spaced.

Claims 1-4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

None of the cited references, alone or in combination, disclose the underpants with the panels as claimed including the convex portion and seam as in claim 1.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose briefs with contoured portions and contoured front panels with curved seams.
